SKILLS

- **HTML, CSS, Javascript**
- **Tailwind CSS**
- **React js**
- **Express js**
- **Mongodb**
- **Nodejs**
- **Git, Github**

EDUCATION

- Bachelor of Computer Application | Veer Narmad South Gujarat University
  (2022-2025)

ACADEMIC PROJECTS

- **Ground Booking Website**

Developed a **full-stack Ground Booking Website** using the **MERN stack**, enabling users to search across multiple sports grounds, view detailed information, and book using a **time slot system**. Integrated secure authentication, real-time availability checks, responsive UI, and an admin dashboard for centralized management.

Key Highlights / Bullet Points

- Built with **React.js (Vite)**, **Node.js**, **Express.js**, and **MongoDB** for a scalable, high-performance application.
- Designed a **responsive UI** using **Tailwind CSS** for seamless experience on all devices.
- Implemented **search** to help users find grounds based on location.
- Developed a **slot-based booking system** with real-time availability validation.
- Created **Admin Dashboard** for managing grounds and bookings
- Integrated **JWT authentication** and **bcrypt password hashing** for secure user access.
- Used **React Hook Form** for form handling, validation, and better UX.
